This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Currently, Botium Toys lacks critical security measures to protect both organizational and customer data and, as a result, is not compliant with many of the elements presented in the National Institute of Standards and Technology Cybersecurity Framework (NIST CSF). Botium Toys would need to implement many access management policies including password requirements, separation of duties, and least privilege. Additionally, the organization needs to incorporate strong encryption procedures to best protect customer PII/SPII which is currently vulnerable.
